

Model	MAKO - AU03100/AU03150
Carrier frequency	433.920 MHz
European ISM Band	433.05 MHz - 434.79 MHz
Carrier radiated (ERP)	0 dBm
Modulation	Digital 00K (ON-OFF Keyng)
Absorption	10 mA
Operating temperature	-20°C + 55°C

Thank you for choosing GI.BI.DI.

Use: When pressing and releasing one of the keys the code will be transmitted on the relevant channel.

Learning codes: position close to the radio receiver and press simultaneously, for at least 6 s, the buttons 1 and 2 of a transmitter already stored. Then press the button of the new transmitter.

Code learning only with receiver AU02820 - AU02920/30: simultaneously press the keys 1 and 2 of a transmitter already stored; the LED's of the receiver and transmitter will start blinking fast and slow down after 5-6 seconds, the receiver goes into pre-learning mode. Within 2-3 seconds press the key associated with the receiver to be set to learning mode. Press any key of the new transmitter which will be stored with the standard channels assigned.

Important warnings: Because of the small size of the product, or some of its parts, it could be swallowed. Keep away from children under the age of 3 years.
