REMOTE PRO
## PROGRAMMING INSTRUCTIONS

MK700

PROGRAMMING YOUR REMOTE TO THE MOTOR

1. Please open the Forza motor by pushing the dark red button located on the motor.

2. Inside the motor, you will see a receiver board, locate the SW1 button and press this once.

3. Next press one of buttons on the new remote (any button) twice.

4. Please wait a few seconds and test the new remote.

5. Put the cover back.

Please note that for unit complexes, the S1 (program) button is usually located in the stand-alone receiver. This can be found near the motor, as shown by the picture below.
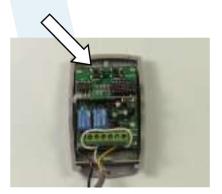

As the arrow pointing, the SW1 (Learn_1) button is inside the receiver, then you can follow the same instructions above.
