REMOTE PRO
PROGRAMMING INSTRUCTIONS

POWERTECH

PROGRAMMING A REMOTE

1. Press and hold the S3 button on the PCB for 1 second. The blue LED light located on the RF board will illuminate.

2. Press the A button for a dual- gate installation and the B button for a single-gate installation on your new remote within 5 seconds.

3. Your remote has been successfully programmed once the LED light turns off.

DELETING THE REMOTE MEMORY:

1. Press and hold the S3 button on the PBC for 3 seconds.
